Photo District News great review of the Pana-Scan 35mm Slide & Film Scanner

Read full review at:

www.pdnonline.com/gear/film/16-fantastic-film-cameras-scanners

The 14-megapixel scanner is capable of producing scans up to 23-megapixels in resolution via software interpolation. It can tackle a range of analogue formats, including 35mm slides and film and 110 and 126 instamatic negatives using the included holders. You can operate it through the 3.5-inch color display and save scans to an SD card. The scanner can also be connected to a PC via a USB 2.0 connection or a TV using the included cable. The Pana-Vue can digitize up to 25 slides at a time.
