QUICK & SECURE MOUNTING & SWAPPING

Our Innovative Magnetic Filter System enables you to quickly attach and detach square filters in any situation. Enables you to capture magnificent scenery changing second by second. Sophisticated design without compromise.

- Slimmer and more compact than traditional slot-in systems.
- Requires less set-up time and makes it easier to swap filters quickly and confidently.
- The strong magnets grab the filter with one touch, holding it tightly and securely, eliminating issues caused by light leaks when using traditional slot-in style square filters.
- One M100 Holder can hold up to 3 stacked filters, allowing you to layer for creative effects.
- The 100mm square glass is mounted in a sturdy metal frame with knurled edges and a wide tab at the top, allowing easy handling without getting fingerprints on the filter.

Holder Specifications

Ultra Slim Design

No Vignetting with 16mm and Longer Focal Length Lenses

**82, 77 and 72 mm
Holder Rings included**

CREATE SPECTACULAR PHOTOS WITH GRADUATED ND FILTERS

The Magnetic Filter System is ideal for using Graduated ND filters, allowing the photographer to easily line up the ND area with the horizon line by sliding the filter up and down on its magnets.

Graduated ND Filters utilize high definition Schott B270 glass.

Double-sided multi-coating for low-reflection and easy daily cleaning.

SOFT GND4/GND8/GND16

SOFT GND8

SOFT GND filters have a soft transition between the dark and light areas of the frame. Ideal for scenes which have no clear horizon line.

SOFT GND4

SOFT GND16

HARD GND4/GND8/GND16

HARD GND8

HARD GND filters have a hard transition between the dark and light areas of the frame. Ideal for scenes which have a very definite horizon line.

HARD GND4

HARD GND16

REVERSE GND4/GND8/GND16

REVERSE GND8

REVERSE GND filters have the darkest area in the middle that fade to the top. Ideal for sunrise or sunset scenes.

REVERSE GND4

REVERSE GND16

Filter Specifications -GND / ND / CPL Filters - Highest-Quality Japanese-made optics have state-of-the-art coatings. They maintain a neutral color and suppress any infrared light casting.
