

**Print File®**  
**ARCHIVAL PRESERVERS**

The photographic storage system for negatives, prints, slides, and transparencies

The Print File archival preservation system offers a complete product line for superior presentation, filing, and storage. A wide variety of preservers are available for use in 3-ring binders, hanging files, and presentation albums.

To help you select preservers that fit your storage needs, Print File positions a letter(s) at the end of each style number to designate how the preservers can be used.

**A-series** negative preservers have attached header card for data. It can be folded easily for mailing or shallow drawer filing.

**B-series** negative and slide preservers are punched for standard 3-ring binders and Print File's OB-1 Custom Binder.

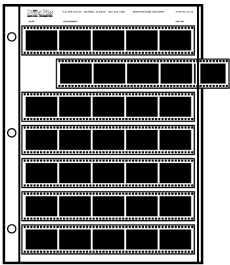

**H-series** negative and slide preservers are designed for hanging files when used with SLB-1 hangers.

**HB-series** negative and slide preservers can be used with either hanger or standard 3-ring binder.

**35mm NEGATIVE PRESERVERS**
