**PRO-CO STATBRUSH 2000**

Anti-static brushes that offer the most effective and efficient static control while cleaning sensitive surfaces.

STATBRUSHES use unique conductive fibers developed for the dissipation of static charges on any surfaces. The mixture of conductive fibers with natural hair ensures both effective static control and efficient removal of dust and debris.

The 30mm fiber length is critical and ensures performance and maximum anti-static effect. There is a thin metal plate insert in the handle of each STATBRUSH that, when the user touches it, enhances the anti-static effect by using the body as a static conductor.

If STATBRUSH dissipates static 100%, then other brands of brushes with longer fibers, can be as little as 40% effective. Long haired brushes also lack the cleaning efficiency of STATBRUSH. They offer a long effective life and can be easily cleaned with soapy water or alcohol.

EDS180 Pro-Co Statbrush- 35mm (1.4" wide)

EDS181 Pro-Co Statbrush- 70mm (2¾" wide)

**Blower Brushes**

Soft bristle brushes attached to a squeeze bulb to propel air. Brushes and cleans lenses and other surfaces safely and efficiently. Blister packed. Order in multiples of 10 each.
