table-top
photography
and
Carabiner Clip
for easy
transport /
hanging weights

T-005X Aluminum Tripod Kit
T-025X Carbon Fiber Tripod Kit

**Legs fold up 180°
for extra
compactness**

**Only 11.8"
when folded**

The exciting new **T-005X/025X Tripods + C10X Head Kits** were specially designed for today's compact point and shoot digital cameras, E.V.I.L. (Electronic Viewfinder w/Interchangeable Lens) cameras, DSLRs and camcorders.

SIRUI T-005X tripods have a shiny, colorful appearance (red, blue or black) that almost makes them look like works of art! The **T-025X** comes in elegant basic black and has 8 layer Carbon fiber legs for added load capacity and stability. The center column is now removable allowing for table-top and low angle photography. In addition, the carabiner clip provides easy transport of your **T-005X** and **T-025X Tripod**.

And their compact size - **only about 12 inches (31cm) when folded!**- is 20-30% smaller than other similar style tripods. There's always room for one of these tiny wonders in your bag or backpack! And, they weigh less than the 1 liter bottle of water you are carrying.

Even though they are compact, and lightweight, these impressive tripods can still extend to over 54.5 inches (138cm) - perfect for most shooting situations. The **T-005X** can hold up to 8.8 lb. (4kg) and the **T-025X** can hold 13.2 lb. (6kg)!

Like the professional line of SIRUI tripods, there is no compromise in quality. Aluminum alloy parts are high temperature forged for maximum strength and SIRUI's custom anodized surface treatment insures superior wear and corrosion resistance.

The C-10X - a high quality ball head that perfectly complements the tripods. The ball head has a color anodized surface that has a distinctive look, while providing excellent resistance to scratches and corrosion. It comes in 3 different colors (red, blue and black) that match the T-005X and T-025X.

Features

1. Removable center column allows for table-top use and low angle shooting (4.3" with C-10X Ball Head)
2. Legs fold up 180° for extra compactness
3. For speed and convenience, each leg has an automatic leg angle lock mechanism
4. 3 position leg angle for uneven terrain
5. Your choice of economical aluminum or lightweight carbon fiber
