PMA@CES 2013 LVH Booth # 46020

Argraph Displays New Sirui G-10X/G-20X Ball Heads

Carlstadt, NJ – Sirui has been a leading manufacturer of ball heads for many years. Their compact size, high load capacity, unique internal locking mechanism (capable of supporting up to 44lb!) and unbeatable price, have made them extremely successful worldwide.

Sirui is always looking for ways to make a great thing even greater. That's why they have introduced the new **Sirui G-10X and G-20X** ball heads at PMA@CES 2013 LVH Booth # 46020.

While keeping all of the outstanding benefits of the current models (separate locking knobs for panning and main locking, secondary safety lock on the quick release platform, special anodized abrasion resistant surface, etc.), Sirui has added some valuable features to their new ball heads.

The **Sirui G-10X and G-20X** now have two bubble levels to quickly help you align your camera system on your tripod. In addition to the bubble level on top of the Arca-compatible Quick Release platform, there is also a very useful second bubble level on the locking knob of the platform. This means you can critically level your camera even if your camera is in a vertical position.

For fast, precise panorama control, the degree scale on the base of the ball head is completely visible. Moving in 15° or 20° increments couldn't be easier!

And the included Sirui quick release plate has a slot to attach your camera strap, without the need to remove the quick release plate from your camera. Very convenient!

As with all Sirui products, the new **Sirui G-10X/G-20X** Ball Heads come with a 6-year warranty.

Sirui products are distributed in the U.S exclusively by Argraph Corporation and are available from photo retailers nationwide. For more details on Sirui products, please go to www.argraph.com or call us at 201.939.7722.

About Argraph:
