Recommended Ball Heads:
G-10X, G-20X, K-10X, L-10

P-326

Recommended Ball Heads:
G-10X, K-10X, G-20X, K-20X L-10

P-324

Recommended Ball Heads:
G-20X, K-20X, K-30X, L-10

P-424

Recommended Ball Heads:
G-20X, K-20X, K-30, L-10, VH-20, MP-20

Features

1. Retractable stainless steel spike for extra grip during outdoor shooting
2. Foam grip for solid hold in wet or cold conditions
3. The mounting plate comes with a double headed, reversible screw that accommodates 1/4" and 3/8" tripod sockets

For ultimate stability, nothing but a tripod will do. However, there are times when a tripod is not practical or allowed. A monopod offers excellent stability when working with long telephoto lenses and makes a difference in low-light situations. Monopods are easy to carry, can be set up instantly and are ideal when you are working in tight spaces.

You've seen sports photographers on the sidelines with huge lenses - they are given small spaces to shoot from and often need to quickly move from place to place. Using a tripod is not an option under these conditions. Only a monopod will do the job!

SIRUI P-306 and P-326 monopods have 6 sections that extend to 60.6 in. (154 cm) when fully opened, yet, are only 15 in. (38 cm) when closed - small enough to fit in a backpack or photo bag. The **Sirui P-324 and P-424** are 4 section Monopods that extend to 66.9 inches and close to 22". They are designed to support more weight at greater heights.

The entry-level **P-204C/224** can extend to an impressive 66.9 inches (170cm) and can hold up to 22lb (10kg). The **P-204C locking knob has been re-tooled** so that they are smaller in order to give the monopod a more sleek feel. Available in economical aluminum (P-204C) or lightweight, 8 layer Carbon Fiber (P-224), these 4-section monopods are an excellent choice for compact DSLRs and camcorders.

L-10

What's included:
Wrist strap & tools, soft carrying case (for P-324 & P-424)
compass (on P-326 & P-306),
instruction manual, warranty card
